

Guidance for Best Practice users on where to find the digital referral template of the updated SAMSAS screening test form:

1. Make sure that your software is updated with the January 2023 update.
2. In your processor template, filter by “supplied” and ensure 'include all states' is unchecked.

The screenshot shows a window titled "Word Processor templates" with a list of templates. The "Supplied" radio button is selected, and the "Include all states" checkbox is unchecked. The "SA Maternal Serum Antenatal Screening referral" template is highlighted in blue. To the right, a preview of the template form is visible, titled "MATERNAL SERUM SCREENING TEST".

Template name	All users	Type
