

# **Position Description**

POSITION TITLE: Research Scientist

LOCATION: SAHMRI, North Terrace

REPORTS TO: Head, Lysosomal Health in Ageing

DEPARTMENT: Hopwood Centre for Neurobiology, Lifelong Health Theme

#### PURPOSE AND SCOPE OF THE POSITION

The incumbent will develop and validate in vivo systems of lysosomal system inhibition and activity measurement, with a focus on genetic systems of lysosome inhibition in tumour cells.

### KEY RESPONSIBILITIES

The specific duties include:

- o Develop in vitro protocols for lysosomal inhibition in tumour cells using transfection and lentiviral delivery of over-expression and shRNA or CRISPR/Cas9 genome editing systems.
- Develop alternative systems and technologies if inducible lysosomal inhibition cannot be achieved using conventional molecular techniques.
- o Contribute to activities aimed at developing and improving measurement of the lysosomal system.
- o Apply in vitro system(s) into mouse tumour models.
- o Analyse, interpret and report data in a timely manner.
- o Actively contribute to the conceptualisation and implementation of research directions based on experimental outcomes.
- o Prepare publication-ready manuscripts, ethics applications, presentations, and reports, in a timely manner.
- o Identify and resolve analytical problems.
- Maintain laboratory records and databases in a timely, accurate, legible and orderly manner, and provide these records for regular inspection.
- o Prepare solutions, media, stains and reagents.
- o Review, analyse and apply relevant literature to research area.
- o Train staff and students in relevant techniques and methods, as required.

- o Ensure that laboratory supplies are appropriately stocked to facilitate productivity.
- Acquire and maintain competence in relevant laboratory techniques and methodologies.
- Acquire and maintain competence in the use and routine maintenance of equipment, as relevant to the work area.
- o Comply with relevant ethics approvals and guidelines, and intellectual property management guidelines.
- o Productively participate in meetings and discussions.
- o Actively contribute to the proper maintenance and functioning of the laboratory.
- o Work collaboratively to identify, protect, and develop intellectual property.
- o Present work at relevant scientific meetings.
- Work collaboratively to identify, forward-plan and implement Lysosomal Health in Ageing's operational and business directions.
- o Prepare Standard Operating Procedures, as and when required.
- Manage activities to ensure that work is conducted within budget
- o Work cooperatively and constructively with other members of the team and their collaborators
- o Maintain confidentiality as it relates to aspects of the work.
- Ensure the effective and efficient use of resources [time, people, equipment, facilities]
- o Participate in special projects to continuously improve processes, tools, systems and organisation.
- o Take reasonable care to protect own health, safety and welfare at work and avoid affecting the health and safety of any other person at work.
- o Participate in the implementation of the Institute's Work, Health and Safety Management System and related laws, regulations and guidelines.
- o Ensure that duties are performed in keeping with the principles outlined in SAHMRI's Vision, Mission and Values and the **Code of Conduct Policy.**

## SPECIAL REQUIREMENTS

- Some out of hours work may be required.
- Vaccinations appropriate to working with human blood.

# **Person Specification**

## QUALIFICATIONS

o BSc in Biochemistry or relevant field; PhD in biochemistry or relevant field is highly desirable

### EXPERIENCE, KNOWLEDGE AND SKILLS

- o Experience in cell biology.
- Experience in cell culture and biochemical techniques, such as transfection, transduction, western blotting, and fluorescence imaging.
- o Working knowledge of lysosomal biochemistry is highly desirable.
- o Ability and willingness to work with small laboratory animals and handle human blood.
- o A level of physical health commensurate with working with small animals.
- o Knowledge of relevant laboratory instrumentation, analytical procedures, data manipulation, and calculations.
- o Able to develop, establish and validate methods, and accurately analyse experimental data.
- o Able to utilise and apply relevant scientific literature.
- o Able to plan and execute experiments in a scientifically and ethically sound manner.
- o Able to apply excellent critical thinking and problem-solving skills.
- Demonstrate attention to detail.
- o Proficient with the use of computers and data handling applications/software.
- o Able to organise, self-direct, and prioritise work activities.
- Excellent verbal and written communication skills.
- Attention to detail.
- Sound time management skills.
- Able to maintain productivity under pressure and within time constraints.
- o Able to work collaboratively and constructively within a team environment.
- o Able to accept accountability and responsibility for own practice.
- o Able to maintain confidentiality as it relates to aspects of the work.
- o Able to function positively in a changing environment.

- o Able to demonstrate the following SAHMRI Values and Culture:
  - Excellence Bold, Driven, Dynamic
  - > Innovation Persistent and Focused
  - > Courage Collaborative and Enabling
  - ➤ Integrity Embrace Diversity, Demand Equity
  - > Teamwork Friendly, Fast, Flexible, Fun

# LICENCES
