

Position Description

POSITION TITLE: Biostatistician, Registry Science
LOCATION: SAHMRI, North Terrace
REPORTS TO: Strategic Director, Registry Centre
DEPARTMENT: Clinical Research and Registry Science

PURPOSE AND SCOPE OF THE POSITION

Provide statistical support to the Australian Transcatheter Valve Therapies Registry (ATVT-R). The registry collects data on all transcatheter cardiac valve procedures undertaken in Australia.

Reporting to the Strategic Director, the position will work closely with SAHMRI biostatisticians and data managers.

There are no direct reports for this role.

The level of appointment will depend on qualifications and relevant experience.

KEY RESPONSIBILITIES

The specific duties include:

- Assist in the management of data collected through the registry and the preparation of routine reports.
- Participate in and contribute to ongoing research projects.
- Contribute to the design, development and application of statistical methods.
- Collaborate with multidisciplinary teams, including clinicians, biostatisticians, data managers, and researchers.
- Assist stakeholders and researchers in the preparation of written reports and manuscripts for publication.
- Keep abreast of and apply new statistical methods.
- Participate in special projects to continuously improve processes.
- Take reasonable care to protect own health, safety and welfare at work and avoid affecting the health and safety of any other person at work.
- Participate in the implementation of the Institute's Work, Health and Safety Management System and related laws, regulations and guidelines.
- Ensure that duties are performed in keeping with the principles outlined in SAHMRI's Vision, Mission and Values and the Code of Conduct Policy.

SPECIAL REQUIREMENTS

- Some out of hours work may be required.

Person Specification

QUALIFICATIONS

- Essential: Relevant honours degree or equivalent in statistics or biostatistics
- Desirable: Postgraduate research degree (Master's or PhD or equivalent) or relevant work experience in a similar role

EXPERIENCE, KNOWLEDGE, AND SKILLS

- In-depth understanding of biostatistics concepts
- Demonstrated knowledge of and experience in statistical analysis of research data (including survival, linear mixed models and analysis of longitudinal data)
- Knowledge of and experience in programming using statistical software programs such as SAS or R
- Excellent communication skills, both written and verbal with the ability to interpret and explain results of statistical analyses to others
- Familiarity and experience in a health-related environment with large-scale observational databases
- Understanding of data management and cleaning principles for large scale clinical research
- Ability to build relationships and establish rapport within a team environment
- Detail-oriented with strong organizational and time management skills to complete work within required timeframes.
- Support SAHMRI's commitment to reconciliation and acknowledge the importance of working in partnership with Aboriginal and Torres Strait Islander People
- Able to demonstrate the following SAHMRI Values and Culture:
 - **Excellence** – Bold, Driven, Dynamic
 - **Innovation** – Persistent and Focused
 - **Courage** – Collaborative and Enabling
 - **Integrity** – Embrace Diversity, Demand Equity
 - **Teamwork** – Friendly, Fast, Flexible, Fun
